

**APPENDIX D:           Charts of transects and pollock density from the winter and summer hydroacoustic surveys of the EBS shelf and Bogoslof area, 1991-97**

The following figures are included:

1.     Pollock density (acoustic signal) along trackline during the winter 1991 EBS shelf and Bogoslof surveys. Shelf survey dates were Feb 15-22, 1991, and Bogoslof survey followed the shelf survey.
2.     Pollock density (acoustic signal) along trackline during the winter 1993 EBS shelf and Bogoslof surveys. Shelf survey dates were March 6-12, 1993, and followed the Bogoslof survey.
3.     Pollock density (acoustic signal) along trackline during the winter 1995 EBS shelf and Bogoslof surveys. Shelf survey dates were April 2-13, 1995, and followed the Bogoslof survey by a month.
4.     Pollock density (tons/nmi<sup>2</sup>) along trackline during the winter 1993 EBS shelf survey (March 6-12, 1993).
5.     Pollock density (tons/nmi<sup>2</sup>) along trackline during the winter 1995 EBS shelf survey (April 2-13, 1995).
6.     Pollock density (tons/nmi<sup>2</sup>) along trackline during the summer 1994 EBS shelf survey.
7.     Pollock density (tons/nmi<sup>2</sup>) along trackline during the summer 1994 EBS shelf survey E of 170°W.
8.     Pollock density (tons/nmi<sup>2</sup>) along trackline during the summer 1996 EBS shelf survey.
9.     Pollock density (tons/nmi<sup>2</sup>) along trackline during the summer 1996 EBS shelf survey E of 170°W.
10.    Pollock density (tons/nmi<sup>2</sup>) along trackline during the summer 1997 EBS shelf survey.
11.    Pollock density (tons/nmi<sup>2</sup>) along trackline during the summer 1997 EBS shelf survey E of 170°W.
