

2000 BSAI HARVEST SPECIFICATIONS

Final BSAI harvest specifications published in the Federal Register at 65 FR 8282 (February 18, 2000).

Table 6. Gear Shares and CDQ Reserve of BSAI Sablefish TAC
[All amounts are in metric tons]

Subarea & Gear	Percent of TAC	Share of TAC	ITAC ¹	CDQ Reserve
Bering Sea				
Trawl ²	50	735	624	55
Hook-&-line/pot gear ³	50	735	N/A	147
Total	100	1,470	624	202
Aleutian Islands				
Trawl ²	25	607	515	45
Hook-&-line/pot gear ³	75	1,823	N/A	364
Total	100	2,430	515	409

NOTES to Table 6

1. Except for the sablefish hook-and-line and pot gear allocation, 15 percent of TAC is apportioned to reserve. The ITAC is the remainder of the TAC after the subtraction of these reserves.
2. For the portion of the sablefish TAC allocated to vessels using trawl gear, one half of the reserve (7.5 percent of the specified TAC) is reserved for the multi-species CDQ program.
3. For the portion of the sablefish TAC allocated to vessels using hook-and-line or pot gear, 20 percent of the allocated TAC is reserved for use by CDQ participants. Regulations in § 679.20(b)(1) do not provide for the establishment of an ITAC for sablefish allocated to hook-and-line or pot gear.
